Introduction

Power Software Wiper is a replacement for the standard Windows Add/Remove Software dialog. It loads fast and offers some additional features to remove leftover files and registry entries, as well as a forced uninstall mode for programs that did not come with a common uninstall tool. The program uses the original uninstaller first, and upon completion scans your registry and hard drive for any leftovers. It will then present you with a list of found items and you can choose to have them removed.

Power Software Wiper provides powerful features to both beginners and experienced users. It offers you some simple but effective and powerful approaches to manage (uninstall, delete, disable from auto starting) and to get information about your installed and/or running applications.

All the steps used by Power Software Wiper are done with simple clicks. You won't even notice the analysis process. Just share it now!

Features

What the Power Software Wiper is and what you can do with it:

- Friendly and easy to use GUI.
- List all installed programs, system updates and screen savers quickly.
- Backup the registry info of all installed programs.
- Add comments for selected programs in the registry.
- Export any program uninstall information to registry file.
- Display programs in 3 different views (Icons, List and Details).
- View all details any application installed on your computer.
- Clean up remnants of program files and registry keys after uninstalling.

- Lightning speed at startup is faster than the Add/Remove Program of Windows XP.
- Ability to uninstall screen savers.
- Quickly open program Install folders, company sites or support sites.
- Create a full report for installed programs and save reports to a text file.

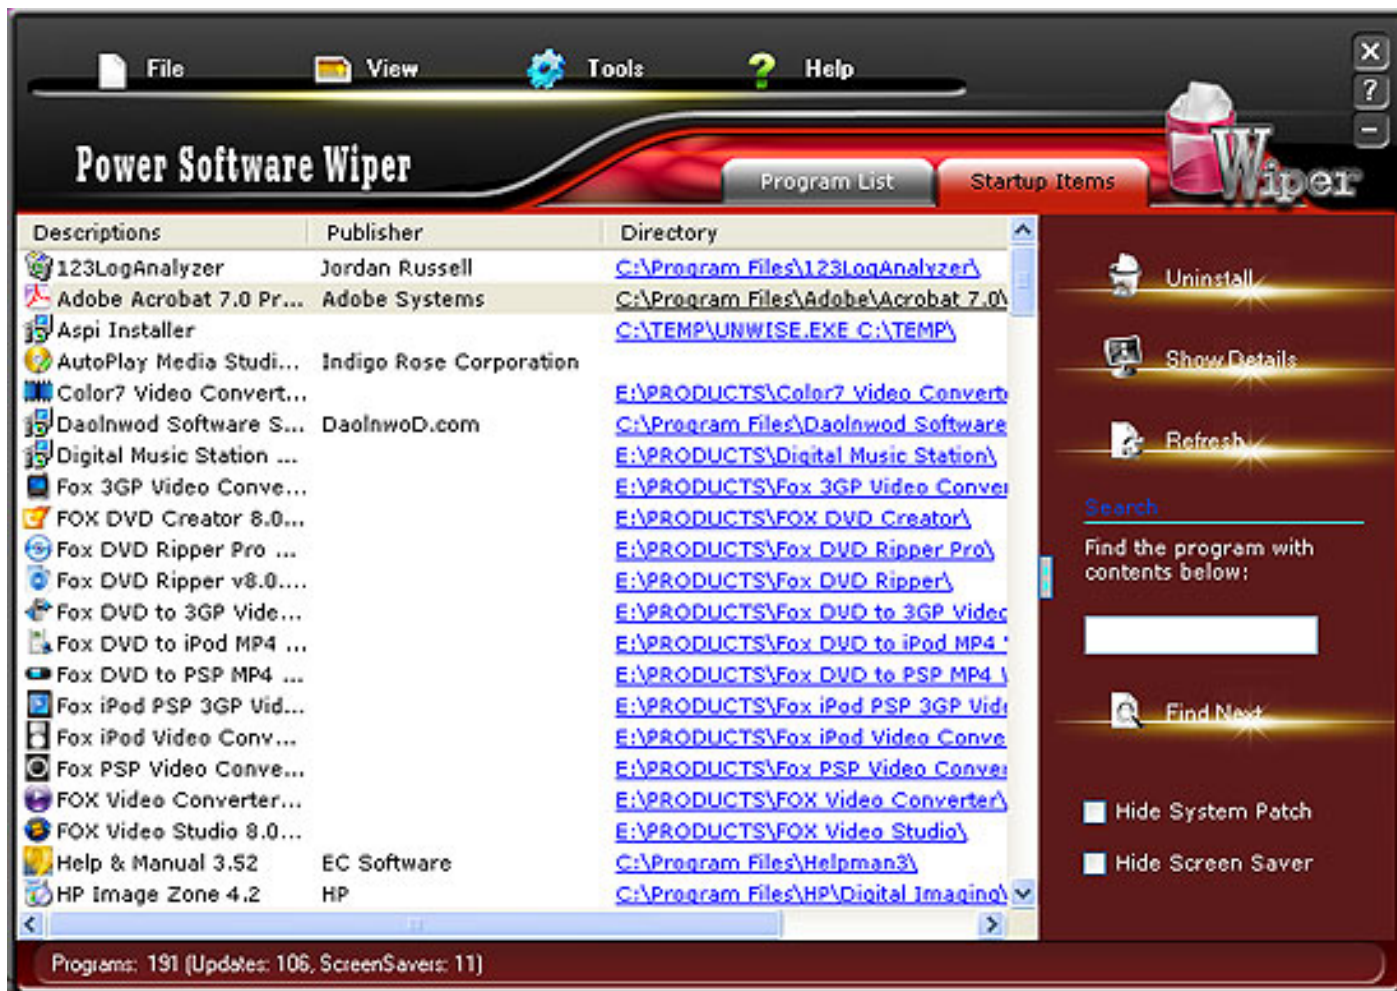

And more...

Rather than wondering why your PC is running so sluggishly, just get Power Software Wiper, an easy to use suite for uninstalling applications and keeping your computer clean.

Power Software Wiper

The user interface (Overview)

The user interface (Overview)

FAQs

➤ Q: How to disable/enable an application from auto start?

A: You only have to remove the check mark in front the application you want to disable from Startup Item when Windows starts. And conversely to enable it put a check and it is enabled.

➤ Q: How to uninstall an application with Power Software Wiper?

A: In Uninstaller there are three ways. Select the application in the list and press "Uninstall" button in the quick shortcut panel on the left , double click or press right mouse button over the application in the list and select "Uninstall" command.

➤ Q: How to search the installed application?

A: On the left of main area, there are a quick shortcut panel, you just type the program name you want to search, then click the Find Next button.

➤ Q: How to change View type?

A: From the uninstaller toolbar you can change the view of the list of applications. You have to use drop down button and click on the little arrow on its right side, which will show you the menu with all list view options - Icon, List and Report. Other faster and simple way to change that view is by just clicking on the View button.

➤ Q: How to backup the registry information of the installed program?

A: Enter the File menu, just click the Create Backup, then it will backup your registry information of the installed program automatically.

➤ Q: How to enter the location of installed program?

A: In the program list, there are the directory of the program, just click the hyperlink, then it will open the folders.

➤ Q: How to export the programs list?

A: Enter the File menu, drop down to the Export Programs List, click it, then you can save and print the program list.

How to buy Power Software Wiper

As soon as you make your order, our resellers will verify it. Your order will most likely be processed within less than 1 hour, but in some VERY rare cases it may take resellers more than 24 hours to process your payment.

The registration key will be automatically generated at our server and e-mailed to you immediately after we receive payment confirmation from our e-commerce reseller.

Please do not worry if you haven't received the registration information right away. Delays usually occur due to the high security settings of spam filters used by our clients. Our message may be rejected as a spam message by the mail service you use.

If you haven't got the registration message within several hours, feel free to contact our [Support Team](#) via email.

If you have questions concerning our software, send e-mail to: support@windowssupporter.com. **We always do our best to help you!**
